

# FIBRE Data Input Meeting

August 23, 2001

DjB, TAA, LMC, GMV, JGS

Action item for DjB: make sure latest Bits Memo is on web.

Action item for DjB, JGS, RAS, FP: Confirm that F-P position in  $\mu\text{m}$  of spacing is preferred.

Action item for DjB: Work out algorithm for Fabry-Perot position

Action item for DjB, JGS, RAS: Figure out what the “data reduction calibration pipeline” has to do; e.g., what is AutoCorrelator for?

Action item for DjB: Contact Hiro to get “Is\_Chopping?” bit and “Chop\_Offset\_Sign” bit.

Action item for DjB, RAS, JGS: What do the Chop Coadder, Frame Differencer, and Pair Averages actually do?

Action item for DjB, RAS, JGS: Figure out how to have defined coaddition for booleans.

Next Meeting: Wednesday, September 5 at 10am in lab for Chop Coadd Demonstration
